

Evacuation Plan

- Establish a means of alerting family members.
- Develop a standard evacuation route.
- Agree on a place for family members to meet after evacuation.
- Review your prized possessions in advance and consider storage in safety deposit boxes.
- Have a list of items to evacuate (important personal papers, photo albums, etc.).
- Learn how to shut off your power and gas.
- **DO NOT PANIC!**

Safety Precautions

- Have an adequate water supply.
- Preconnect a garden hose with nozzle and sprinkler system to access all the outside surfaces of the structure, including the roof.
- For a nonpressurized water system, have a large barrel of water and a five-gallon bucket available.

Natural Resources and
Environmental Protection Cabinet

For more information, contact
your local cooperator.

The Natural Resources and Environmental Protection Cabinet does not discriminate on the basis of race, color, national origin, sex, age, religion, or disability and provides, on request, reasonable accommodations including auxiliary aids and services necessary to afford an individual with a disability an equal opportunity to participate in all services, programs, and activities. For more information, contact the Division of Forestry at (502) 564-4496 between 8 a.m. and 4:30 p.m. EST. Hearing- and speech-impaired persons can contact the agency by using the Kentucky Relay Service, a toll-free telecommunication device for the deaf (TDD). For voice to TDD, call TDD to voice, call 1-800-648-6056.

**You could lose your
home to a wildfire.**
*Prepare your home,
family and
community for
survival*

Checklist for Homeowners

Beware and prepare to reduce the threat of wildfire to your home. This checklist will help you identify ways to reduce home and property wildfire hazards and to prepare your family and neighbors for the event of wildfire.

For further information, contact your local fire department or your local Division of Forestry district office.

New Home Construction

- Build home on the most level portion of the lot. (1)
- Use fire resistant materials on roofs and exterior siding. (2)
- Avoid combustible roofing material.
- Screen eaves, attic and floor openings to prevent embers from entering.
- Screen the chimney and stove pipe. (3)

Existing Home Construction

- Remove site preparation debris.
- Reduce surrounding wildland fuels, such as rotting logs, branches, brush and other flammable materials.
- Do an exterior home inspection at least twice a year.
- Remove overhanging tree limbs, moss and needles from the roof and gutters. (4)
- Maintain a defensible space around the house. A large, green lawn is ideal. (5)
- Remove highly flammable plants from around the house, especially on the side most exposed to prevailing winds, and on the downhill slope. (6)
- Clean chimneys and stove pipes; check their screens. Keep storage areas clean and tidy. Never allow rags or newspapers to accumulate. Store flammable liquids in approved containers. (7)
- Stack firewood away from the house. (8)
